All school aged students who use asthma medication(s) at school must have a current School Asthma Plan completed and signed by their LHP and kept on file in the school office (RCW 28A.210.320 370). The form must also be signed by a parent/guardian. The plan must be updated each year and when there are major changes to the plan (such as in medication type or dose).											
The school plan is intended to strengthen the partnership of families, healthcare providers and the school. It is based on the NHLBI Guidelines for Asthma Management.
